International Commission on Occupational Health- Mining Occupational Safety and Health ICOH-
MinOSH Series of Webinars

3rd MINOSH WEBINAR

“Update on Silicosis Detection and Relief – Sharing Experiences”

29th June, 2022, 18.30-21.00 Hrs. (Jakarta Time) or 7:30PM (Manila Time)

Registration Link: <https://bit.ly/MinOSHWebinar2022>

Workers are exposed to silica particles in several occupations which can cause silicosis. However, a large number of cases of silicosis are undetected, undiagnosed or misdiagnosed due to lack of health surveillance and detection systems. In this webinar, you will find updates on the surveillance, prevention and control of silicosis that remain a challenge for occupational health professionals, governments and all other institutions involved in worker health, safety and welfare.

Programme Schedule

- 18.30** **Welcome Address and Opening Remarks**
Jinky Leilanie Lu, MOH, PhD
Chair- MinOSH,
Research Professor- National Institute of Health
University of Philippines Manila
- 18.40** **Advances in Silicosis, and Diagnostic Images for Occupational Lung Disease: ICOERD**
Prof. Narufumi Sukanuma
